## **Management of Various types of Degradable & Nondegradable Waste**

## A. Solid Waste Management:

Anand Vishwa Gurukul Senior Night College is located within the municipal limits of Thane Municipal Corporation (TMC). Being a municipal area, solid waste generated from the College is segregated in Dry Waste and Wet Waste as per the guidelines of the Corporation. The College makes use of system of segregation of waste into biodegradable and bio-non-degradable wastes. The college takes affirmative actions for not only segregation of waste but also in disposal of the waste collected. The college makes sure that the non-degradable waste is sent for recycling. The Waste Lifting Vehicles of the Corporation visit the locality daily for the collection of waste for their safe disposal outside the city limits.

## B. Liquid Waste Management:

The internal liquid waste disposal system of the College has been developed as per the guidelines of the Thane Municipal Corporation. The internal drainage system of the College is cleaned on an annual basis and is well maintained. Through this system, liquid waste is discharged in the centralized liquid waste disposal system of the Municipality for treatment and safe disposal. No hazardous chemicals are let out by the college. The water coolers are cleaned regularly, and the wastewater is let out from the potted plants in the premises. Rainwater is discarded to the Corporation's Storm Water Drainage System. Leakages, if any, in the internal waste management system of the College are checked and repaired immediately.

### **C. Waste Minimization and Recycling Strategies:**

The College follows the policy of recycling resources, especially papers, and envelopes in the following ways:

- Reuse of printed paper on both sides for printing.
- Reuse of envelopes using pasted addresses.
- Newspapers are used for packing.
- Used papers are sold out as scrape.
- For Vivas, the use of Power Point Presentations is made compulsory, and the submission is strictly online.

## **Water Conservation & Water Management**

## Rainwater Harvesting

Under the rainwater harvesting system, rainwater flowing from the terrace is diverted towards the campus area and garden area, where the water is absorbed by the soil. This enhances the water table in the campus and its surrounding region.

## Disposal Pipes Diverting Roof Water down.

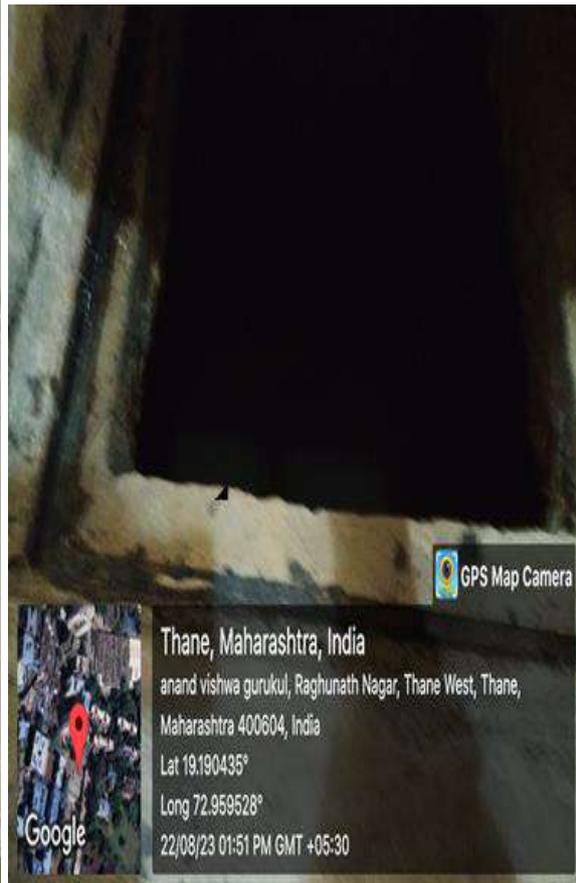

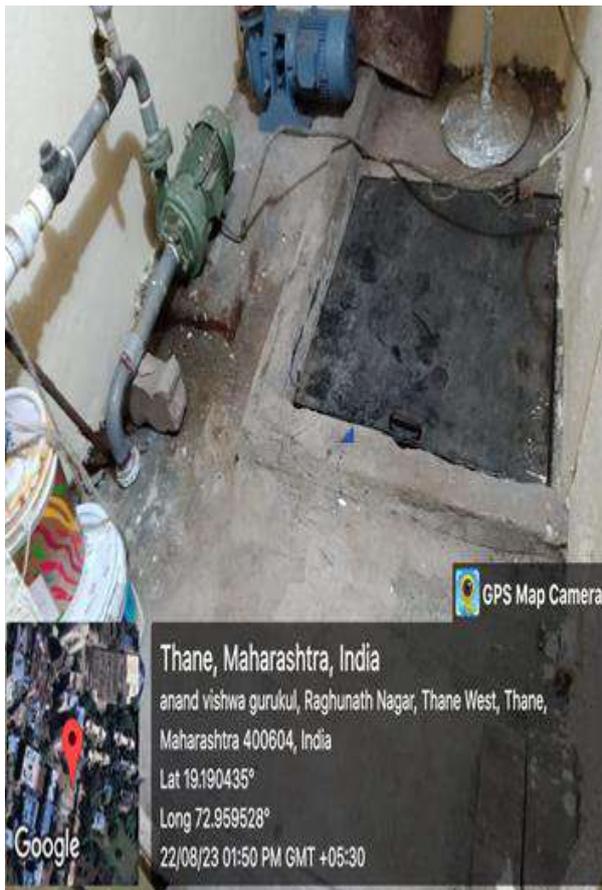

I/C PRINCIPAL

ANAND VISHWA GURUKUL SR (NIGHT) COLLEGE, THANE

## Maintenance of Water Bodies and Distribution System in the Campus

There is one water tanks on the ground floor and 1 water tank on the terrace having storage capacity of 15000 liters and 5000 liters respectively, which are used for the storage of water supplied by the Corporation. From these tanks, water is supplied throughout the entire building.

Both these water storage tanks are cleaned at a regular interval. Each tank takes three days to clean with water and potassium permanganate. The dirty water is thrown out and this process is repeated 2-3 times. Water tanks are unlocked only for the process of cleaning, otherwise the water tanks remain locked.
