Brief Report of Facilities Provided under Metric 7.1.2

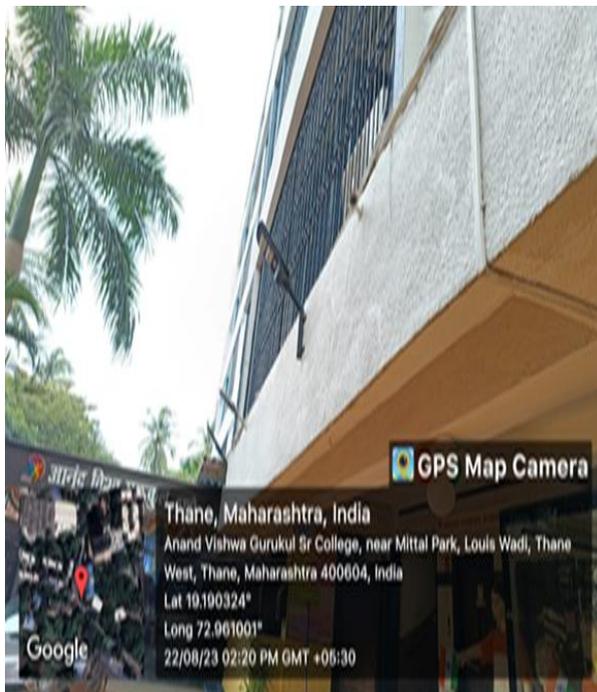

Report: Alternate Sources of Energy & Energy Conservation Measures

Introduction

Anand Vishwa Gurukul Senior Night College is dedicated to fostering sustainability and responsible energy practices. We have implemented various initiatives aimed at utilizing alternate sources of energy and conserving energy resources. These measures not only reduce our carbon footprint but also set an example for our community and inspire our students to embrace environmentally friendly practices.

Solar Lights in College Campus

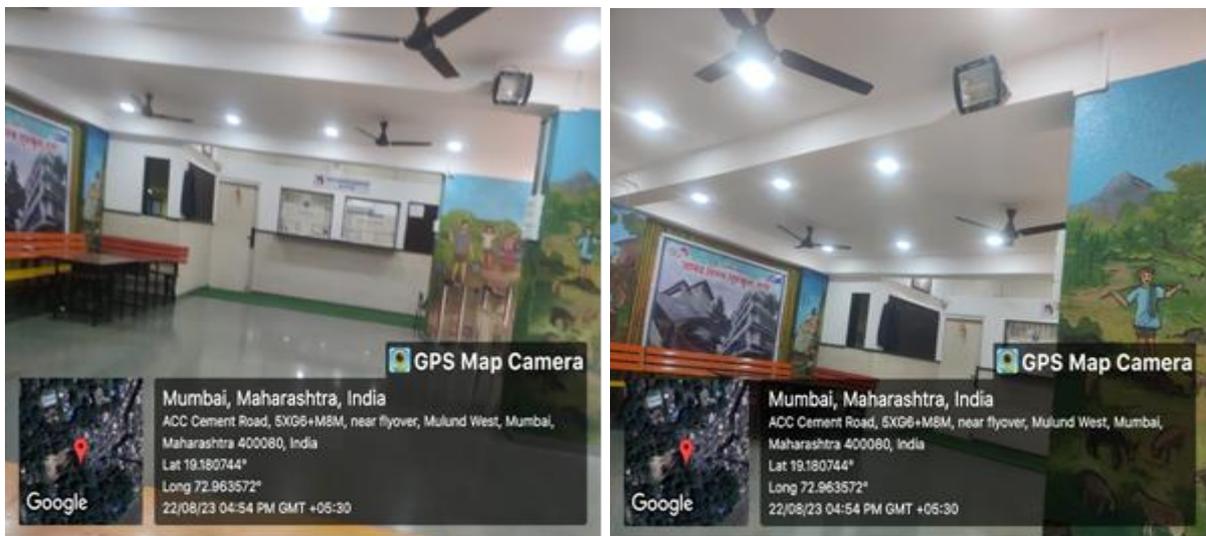

One of our notable initiatives is the implementation of solar lights across our campus. These solar-powered lights illuminate pathways and common areas, serving as a symbol of our commitment to a greener future. By harnessing the power of the sun, we significantly reduce energy consumption and greenhouse gas emissions. This initiative not only enhances safety and aesthetics but also educates our students about the potential of renewable energy sources.

LED Lights in Campus

In our continuous efforts towards energy efficiency, we have replaced conventional lighting systems with energy-efficient LED lights. These state-of-the-art LED lights not only reduce energy consumption but also create a vibrant and inviting atmosphere for our students during night classes. This initiative aligns with our institution's values and sets an example for our community to follow in pursuit of a brighter and greener future.

Save Electricity Sign Boards

We have strategically placed geotagged photographs of "Save Electricity" sign boards throughout the campus to promote energy conservation awareness among students and staff. These visual reminders encourage everyone to be mindful of their energy usage and take steps to minimize wastage.

Report: Management of Various Types of Degradable & Non-degradable Waste

Solid Waste Management

Our institution is located within the municipal limits of Thane Municipal Corporation (TMC), and we adhere to their waste management guidelines. We segregate waste into biodegradable and non-biodegradable categories. Non-degradable waste is sent for recycling, aligning with our commitment to responsible waste disposal. The Corporation's Waste Lifting Vehicles collect waste daily for safe disposal outside the city.

Liquid Waste Management

Our internal liquid waste disposal system complies with TMC guidelines. We clean and maintain the drainage system annually, ensuring the safe discharge of liquid waste into the centralized disposal system for treatment. No hazardous chemicals are released by the college, and wastewater from water coolers is directed to the premises' potted plants. Rainwater is diverted to the Corporation's Storm Water Drainage System, and any leakages are promptly repaired.

Waste Minimization and Recycling Strategies

We actively practice waste minimization and recycling. Measures include reusing printed paper, envelopes, and newspapers, as well as selling used papers as scrap. Additionally, for academic purposes, we promote the use of online submissions and PowerPoint presentations to reduce paper consumption.

Report: Water Conservation & Water Management

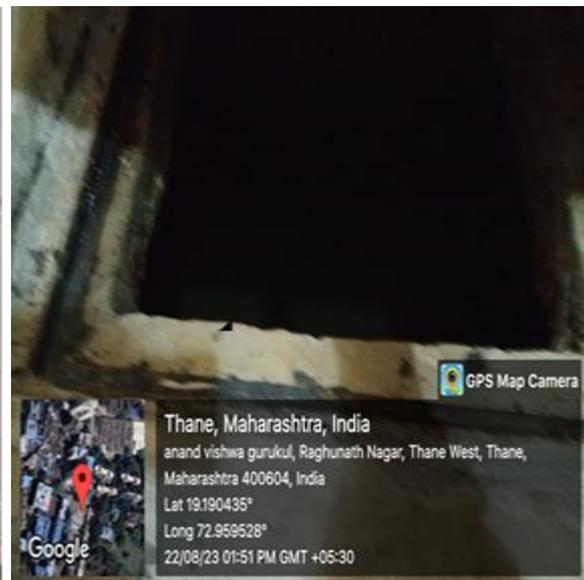

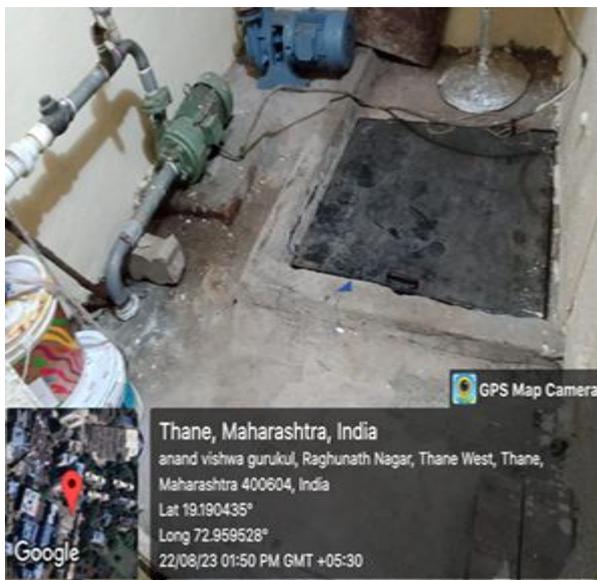

Rainwater Harvesting

Our rainwater harvesting system diverts rainwater from the terrace to campus and garden areas, enhancing the local water table and contributing to water conservation.

Maintenance of Water Bodies and Distribution System

We maintain two water storage tanks with capacities of 15,000 liters and 5,000 liters, respectively, for the Corporation's supplied water. Regular cleaning ensures water quality. Tanks are unlocked only during cleaning to maintain security.

Green Campus Initiatives

Our commitment to sustainability extends to several green campus initiatives, including tree plantation, campus cleaning drives, and seminars on Swachhata (cleanliness).

Disabled-friendly, Barrier-Free Environment

1. Tree Plantation in College campus

2. Campus Cleaning Drive

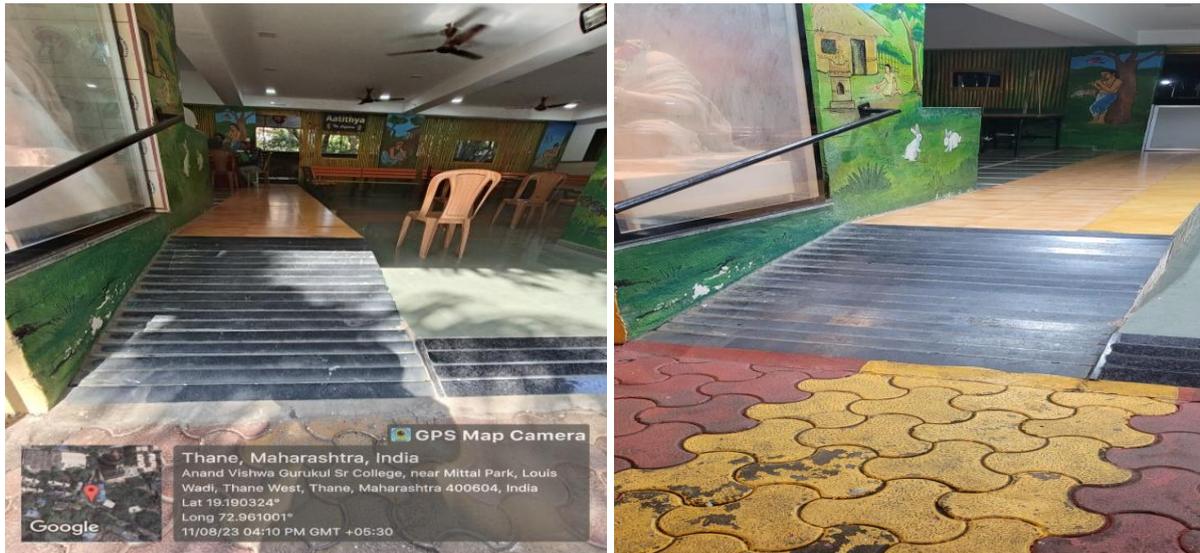

3. Seminar on Swachhata

Report: Barrier Free Environment

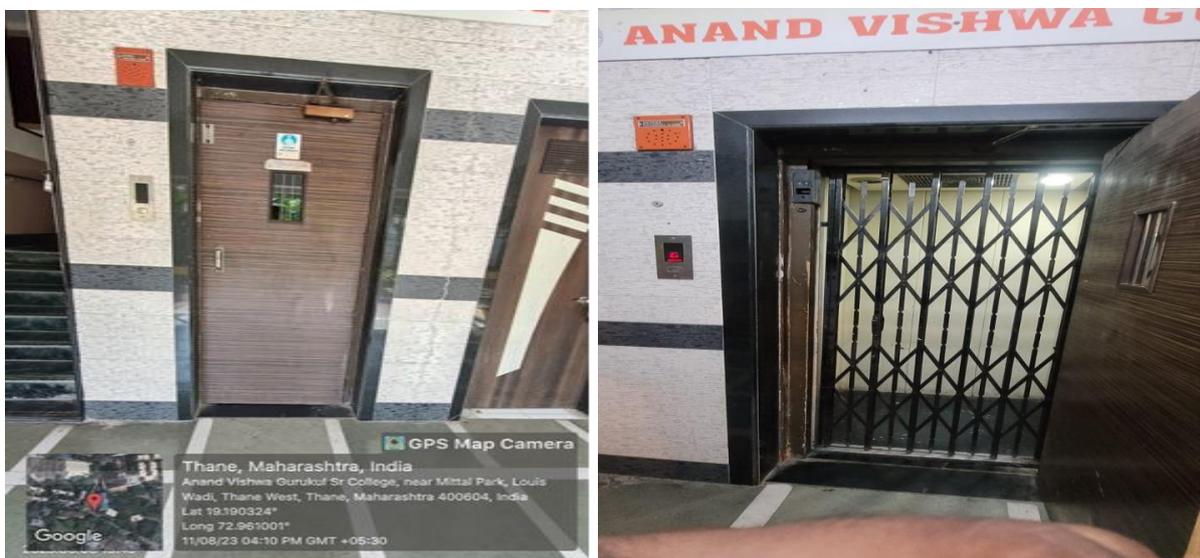

Ramp Facility

Our Ramp Facility exemplifies our commitment to inclusivity and accessibility. It provides a seamless pathway for individuals with mobility challenges, ensuring they can navigate the campus with ease and dignity.

Elevator Facility

To further support students with disabilities, our campus is equipped with elevator facilities. These elevators empower physically challenged students to access all areas of the campus comfortably, promoting equal opportunity in education.

Anand Vishwa Gurukul Senior Night College
